Biographical / Historical

Rudolf Kingslake was one of two founding faculty members of what was to become the Institute of Optics at the University of Rochester in 1929, the other being A. Maurice Taylor of Cambridge University. The faculty was completed in that first year by Brian O'Brien. These three taught geometrical, physical, and physiological optics respectively. Hilda Kingslake was also highly qualified in optics, and was briefly employed in optical design and research. She devoted most of her prodigious energy to civic betterment, especially the concerns of women, and to providing reading material for shut-ins, as well as raising the two Kingslake sons. She was very influential in the establishment of the Optical Society of America, and served as its president (as did Rudolf.) She chronicled the history of OSA, as well as the history of the Institute of Optics. By her wishes, few of her personal papers remain. The original name of the Kingslake family was Klickmann, which father Martin Klickmann changed to Kingslake in May 1917, due to strong anti-German sentiment in Great Britain during the first World War, vide M8. This finding aid was compiled by Martin L. Scott, for many years a friend of
the Kingslakes. He is writing a biography based on these papers, and would welcome contributions at mscott@rochester.rr.com of letters and reminiscences from others who knew the Kingslakes.

**Scope and Contents**

The Kingslake Archive contains the papers and related items of two giants in the field of optics, Rudolf Kingslake and his wife Hilda Conrady Kingslake. Dr. Kingslake kept detailed records of almost everything he did, much of which is preserved in this Archive. This chronicle begins at his birth with an extraordinary book kept by his father, vide M38. Correspondence, publications, teaching records, technical and historical presentations, awards and distinctions, and family papers are here. The records of his work at Eastman Kodak Company as Director of Optical Design are not here, and probably were destroyed by the company as part of its curiously-named Record Retention Program. In his retirement years Rudolf made an extensive index of objects in the Technology Collection of George Eastman House, the International Museum of Photography and Film, and these are filed as the K# series at that Rochester, NY institution. The extent of his influence in the field of optics may be judged by there being in early 2008 more than 16,500 citations of his name in the popular Internet search engine, Google.

The series included in this collection are: A series, which contains miscellaneous correspondence. CFL series contains the Christmas Family Letters from their inception in 1963 through 1970. These documents were produced by Martin Kingslake, compiling contributions he solicited from his six living children scattered over the world. Each child wrote up the year's activities of themselves, their spouses, and offspring. Each CFL contains up to 70 typed pages printed by offset lithography, drilled, covered, and string-bound. Final copies were sent by Father Kingslake to all contributors. FC series consists of correspondence relating to the Kingslakes' family and friends, and sorted by years. Many of the letters are with their original mailing envelopes, some of which have interesting notes by the recipients. M series contains miscellaneous papers, books, and objects found in desk drawers and various places in the home. They are listed in the order found, but there was no apparent original order. P series contains personal papers: birth, medical, marriage, education, recreation, travel, social, financial. S series covers mainly, but not exclusively, the years of RK's retirement.

Dates written thus: DDMonYY are 20th century. Others are DDMon18YY or DDMon20YY with the millennium indicated in full.

The abbreviations used in this finding aid are:

AEC: Alexander Eugen Conrady, father of HGK, tutor of RK and HGK, Married Annie Bunney, daughter of an inn-keeper, Apr01, died 16Jul44, (Annie, 28May41). Hilda oldest of four daughters with Doris, Rene, Mable

BJT: Brian J. Thompson, literary executor for RK

EK, EKCo: Eastman Kodak Company

Restrictions on Access

The Kingslake Papers is open for research use. Researchers are advised to contact the Rare Collections & Preservation Department prior to visiting. Upon arrival, researchers will also be asked to fill out a registration form and provide photo identification.

Immediate Source of Acquisition note

Beginning in 2002, the Kingslake papers were gathered and placed in the Rare Books and Special Collections Division of the Rush Rhees Library of the University of Rochester by Dr. Brian J. Thompson, Rudolf’s literary executor. He was a long-time friend of the Kingslakes, a former Director of the Institute of Optics, and is now (2009) Provost-Emeritus of the University.
Restrictions on Use

In consultation with a curator, reproductions may be made upon request. Permission to publish materials from the collection must be requested from a curator. Researchers are responsible for determining any copyright questions.

CFL

Scope and Contents

The CFL series contains the Christmas Family Letters from their inception in 1963 through 1970. These extraordinary documents were produced by Martin Kingslake, compiling contributions from his six living children scattered over the world. Each child wrote up the year's activities of themselves, their spouses, and offspring. Each CFL contains up to 70 typed pages printed by offset lithography, drilled, covered, and string-bound. Bound copies were sent to all contributors. Every person referred to is coded to indicate relationship to Martin Kingslake, e.g. GGC=great-grandchild. Two more documents preceded the Family Christmas Letters. They were The Family Tree Book, and The Family Party, which are known only by being referred to in CFL1. No copies of these are in the Archive. The Family Party covered the period July 1950 to December 1960. CFL1 picks up at that point. After 1970 there is an interruption in this series till we find collections of received Christmas cards gathered from various drawers and bookcases by BJT when the apartment at Valley Manor was closed. These cover the years 1997 through 2003. There is nothing written by RK or HGK in these. The précis here mention only the material submitted by the Rochester Kingslakes for themselves and David's family. There is extensive material from other branches of the Kingslake family.

Scope and Contents

1963 Rudolf reports working on the second edition of "Lenses in Photography", and of editing a multivolume, multiauthor work on optical design. He ruefully notes that writing these various articles himself (which he was thoroughly capable of) would have been easier than the extensive rewriting that most authors' manuscripts require. Hilda continues busy on various committees and boards of welfare agencies, and on her library service to 16 nursing
homes, which is now in its tenth year. Much activity related
to OSA, including Hilda's major involvement with the
Rochester Oct62 meeting. In Mar63 both attended OSA
in Florida, RK flying down, HGK driving – a three-day
trip. Impressed by launch of Saturn rocket. Grand-daughter
Ann (4yo) visits in Rochester for 2 weeks. David works for
industrial firm in PA.

CFL2

Scope and Contents

1964 Shock over death of Pres. Kennedy. Very pleased with
visit to Japan. Hilda addresses local chapter of OSA on rise
of applied optics since 1900. David for first time writes for
himself. He bought a rural house in eastern PA. Drives VW
to the NJ shore on weekends, getting 35mpg compared to
15-20 for American cars. D continues flute lessons.

CFL3

Scope and Contents

1965 RK reports 10 nationalities taking his evening classes
at UR. HGK writing a history of OSA. David's wife Joan
writes for the CFL this year. Ann in Montessori school,
suffers encephalitis, but recovers. Family recreations center
on out-of-doors activities.

CFL4

Scope and Contents

1966 RK reports the upset to his system by jet flights from
cost to coast. Enjoyed presenting a 2-week intensive course
at UCLA, then VistaDome train back to Chicago. Visiting
foreign optikers some mainly from India, Japan, England.

CFL5

Scope and Contents

1967 High-speed electronic computers now replace
laborious older methods. RK's 5th volume "Applied Optics
and Optical Engineering" finally published. He vows never
again to edit a multi-contributor work, as many of the
authors were not dependable. David reports daughter Ann
seems to have inherited her father's scholastic ineptitude.
David takes up photography, and RK brings him the family's
darkroom equipment.
Scope and Contents

1968 RK will retire at the end of this year, according to Kodak's policy requiring retirement at age 65. Extensive travels and teaching in the American far west.

CFL7

Scope and Contents

1969 This year, Martin Kingslake, the driving force behind the CFLs, died 13Dec1969 at age 93. Although retired from EK, R still teaches at UR and lectures extensively around the US. Having no secretary now, he fixes up a spare bedroom for a study. While in England R and H visit their Kodakid Kenneth Dyson, now in ambulance service of RAF. 40th wedding anniversary. David sees his future not in the technological world, but in the artistic.

CFL8

Scope and Contents

This last of the Christmas Family Letters is a rough assembly of separate letters the Kingslake siblings sent to each other. By its irregular mix of typed, duplicated, and hand-written contributions it shows the powerful organizing force Father Martin had provided. RK volunteers to take up Father's role in distributing the Letter, and suggests all send pictures to be included next year. This seems not to have happened. Rudolf, eldest of the siblings, speaks for all, "We were all greatly saddened to hear of Father's death, just over a year ago, and the family will never again feel quite the same. He was a remarkable leader and kept us all together in a wonderful way." RK reports his happiness in retirement, and his enjoyment cataloging the equipment archive at George Eastman House. Publishing, editing, and lecturing continue. He writes proudly of HGK's work taking over 40,000 books to shut-ins over the past 16 years, for which she received the "Volunteer of the Year Award" from the Council of Social Agencies. RK had built her many wooden racks for the books.

**Scope and Contents**

The FC series consists of correspondence relating to the Kingslakes' family and friends. Most letters are with their original mailing envelopes. These were collected from various locations and grouped in yearly folders. For convenience a copy in this folder of p12 of M38 gives the names, dates, and relationships of family members.
Included in this series are letters from 1929, which was a year significant year that included the marriage of R&HGK, their removal to America, and the founding of the Institute of Optics at the University of Rochester.

Samples: Born 28Aug03, 10:50pm, Rudolf Klickmann, oldest son of Martin Klickmann and Margaret Klickmann (née Higham). Baptized New Church (Swedenborgian) 1Nov03. Precis by BJT in file. Example: MK notes in 3rd year "painfully methodical, sense of order strongly developed; 4th year "Reasoning power strongly developed - as applied to scientific subjects - mathematics, mechanics, etc." The entries through the 9th year are in father's hand, and thereafter in RK's. Note: Page 20 has two pictures of two-year-old RK which are screened reproductions printed by letterpress engraving. This could not have been done for home use, but these must have appeared in some mass-printed publication. Both are well-made commercial photographs, and could have been used in a catalog or advertisement.

RK’s published papers, complete (?) set, signed and numbered in order of publication, e.g. "Op 1." Number 69 in the reprints, "Fredrick Ives Medalist for 1973", contains a list of publications to that date. [In Oversize L.] The earlier papers, published while still in England, show his early competence, and in the discussion sections that follow, show his polite response to just criticism and vigorous defense against unjust. His later publications, following retirement from Kodak mostly deal with the history of photographic apparatus and manufacture. They are not here. Paper Op. 8, An Experimental Study of the Best Minimum Wavelengths for Visual Achromatism, contains letters received: two from H Dennis Taylor and one from William H Wave__ son commenting on the article.

Conradi patent Duncan Moore to BJT, Jan2004. Email. Found 1964 patent (page one copy here) issued to Rudolf Conradi for a microscope illuminator of variable aperture and field size; wonders if this could be RK's invention under the former spelling of his father-in-law's name. [Conradi was the spelling AEC used before he moved to England; spelt Conrady thereafter./MLS] BJT to Moore, 20Jan2004, copy to MLS. Speculates could be a relative or a coincidence. MLS notes that RK was at the time of the patent an employee of Kodak, and as such, had signed over patent rights to his employer. Also to be devious was totally
outside RK's character. Copy of "The Development of the Zoom Lens" by RK, JSMPTE Aug60.

Photographs of AEC, two, about 5x7". AEC's image is here cropped from a larger group picture. (It is remarkable that a family with such involvement in photography should have so few images of this man./MLS).

Lens information index cards. This sample of about one hundred 3x5-inch file cards represents only a small part of a huge alphabetical file created by RK, these few cards detailing only the photographic lenses made by the Wollensak Optical Company of Rochester. The larger collection was built by RK over his professional lifetime as he encountered a photographic lens, a patent, or a description of a new lens. The cards are printed with a form containing the name, application, focus, aperture, classification (according to Kingslake's letter system), patent number, designer, and a drawing of the longitudinal section. If he actually had the lens in hand, he would include notes on its performance as determined on the famous T-bar lens bench of his design. The bulk of the collection is lost. In Oversize L.

Computer's Manual II, a set of notes by RK for an internal course of instruction in the Optical Design Department at Kodak. The term "computer's" here refers to persons who compute, and this was the standard usage until the 1940s. The notes are printed by various processes, with chapters
dated from 11/54 to 5/59. These notes were the gift of
Donald DeJager, a member of RK’s department, and contain
his penciled class notes.

"JA Maurer" A collection MA Maurer (wife of JAM) to RK, note transmits the following 12 items of RK correspondence found among JAM's things after his death. RK to JA & M Maurer, 17Dec83, shares enthusiasm for Texas Instruments TI-59 calculator for optical problems; recalls being in Alaska shortly after 1964 quake. RK&HGK to J&M Maurer, 10Dec84, Christmas letter, books selling well, writing history of photographic lens, tries to read minds of early lens designers, wonders of TI-59 calculator, first EK computer for lens design, Bendix G-15, encourages attending lens design conference in NJ, Halley's comet jingle, value to historian of catalogs over actual apparatus, old movies seen recently at George Eastman House. RK to JA Maurer, 6Dec79, encourages JAM to write history of photographic sound recording, still teaching lens design, IO 50th Anniversary, 50% of graduates attended, HGK's history of IO, editing vol. VI of "Applied Optics and Optical Engineering", RK to JA Maurer, 20Jul87, glad JAM gave
apparatus to Prof. Johnson. RK gave up regular teaching, writing book on history of photographic lens, would be glad to receive microscope lenses, origin of B&L logo. RK to JA Maurer, 28Nov58, sorry for missed phone call, using Bendix and IBM computers for EK lens calculations. RK to JA Maurer, 15Dec73, comments on JAM retiring from manufacture and concentrating on consulting. RK retired 5 years ago, still teaching, comments on small vs large computers, worries about future of lens design. RK to JA Maurer, 16Dec75, uses cameras from his collection to illustrate course in Modern Camera Design, visited Nikon, Canon, Minolta factories in Japan, sees computer control of cameras and cars, "There is no limit to what man can do, except run a country." RK to JA Maurer, 3May78, sending complimentary copy of "Lens Design Fundamentals", ray tracing with SR-52 calculator, written while students take final exam, copy enclosed, lens design book finished, history book now started. RK to JA Maurer, 9Dec80, comments on reception of "Lens Design Fundamentals", JAM apparently too busy to write on movie equipment for "Applied Optics and Optical Engineering" series, getting out of touch with modern optics, salaries of graduates, cost of things in 1929. RK to JA&M Maurer, 10Dec83, "Optical System Design" (notes for the course of that name given for years at IO) now published, gives seminar in Santa Fe, tours Los Alamos Nat. Lab., 80th birthday plaque from SPIE, giving up teaching at IO, taught lens design since 1932 to over 900 students, always enjoy JAM's critical letters. John Flory obituary, Roch. Times-Union 9Oct87, RK to JA Maurer, 20Dec82, how RK got interested in lens design, enjoys teaching, female students do as well as men "and why not?", contributions to EK suggestion system by blacks, women, women as novelists and poets, no women in optics patents he has reviewed, what to include in book on geometrical optics, coherence as basis of Abbe theory of microscope, difficult concepts in optics and mathematics, encourages JAM's use of a TI-59 calculator, uselessness of some optical writing, Herzberger thinks that expressing a problem in notation solves it, as a doctor thinks naming a disease cures it, plans book on history of photographic lens, students at Jerusalem Institute of Technology study religion in morning, optics in afternoon, encourages JAM on writing book on motion picture engineering, gift of EK Disc camera from HGK, death of LC Martin at 90, early teachers at Imperial College, London, IO statistics, Here follows RK's own JA Maurer file Christmas card from M and J Maurer 1959 MA Maurer, to DT Moore, 2May89, inventory of optical glass left by JAM DT Moore to MA Maurer, RK copy, 24Jan89, plans to receive optical glass M&JA Maurer, Dec72, Christmas note, retiring from business at 68 to become consultant M&JA Maurer, 2Dec73, regrets missing OSA meeting in Rochester, needs to design plastic lens for medical imaging, JA Maurer to RK, 21Dec73, philosophy of lens design, separate roles of computing machines and human designers JA Maurer to "RK, Dec76, Christmas card, enthusiastic about optical work with TI-52 calculator, tour of Lick Observatory, visit to Tucson Optical Science Center.
JA Maurer, to RK, 16Dec77, seeing solar eclipse 12Oct, programming SR-52 calculator, design of Erfle eyepiece, machine to grind paraboloidal surfaces. RK to JA Maurer, 3May78, sends copy of "Lens Design Fundamentals" book, competent papers by Offner and Rosin, starting on history of photographic lens book JA Maurer to RK, 16May78, appreciation of "Lens Design Fundamentals", compares with other books, Offner anecdote, AV Bottallico female lens designer JA Maurer to RK, Dec78, Christmas card and note, photographic sound recording JA Maurer to RK, Dec79, Christmas card and note, paper on sound recording progressing well, Ross effect in photographic emulsions, congratulates HGK on history of IO, apologizes for not contribution chapter to "Applied Optics and Optical Engineering" on motion pictures JA Maurer to RK, 13Jan81, Zeiss' delayed appreciation of the methods of AEC, new vs. old optical notation, appreciation of F Twyman's "Prism and Lens Making", principles vs. theory in instructional books, can optical quality be found from calculations better than from actual test of a sample lens? JA Maurer to RK, 23Dec81, early influence of Carpenter/Dallinger "The Microscope and Its Revelations", low regard for Herzberger's chapter on geometrical optics in Handbook of Physics, opinions of several other optical books, takes RK's encouragement to write book on motion picture equipment design, quality of EK and RCA telecine equipment. JA Maurer to RK&HGK, 14Dec83, Christmas card and note.JA Maurer to RK&HGK, 16Dec83, calculation of lens for night vision device, soon to be 80 and wanting to enjoy Halley's comet again as in 1910, picture from Alaskan trip. JA Maurer to RK&HGK, 17Apr87, thanks for TI-59 programs, at 82 having to relearn somethings about optical design, wife six years younger, what to do with lens testing bench, description and photograph of bench. RK to JA Maurer, 8May87, suggests home for JAM's lens testing bench: Univ. of Ala at Huntsville. JA Maurer to RK&HGK, 12Jul87, happy with Univ. of Ala. As home for lens tester, offers RK many microscope objectives he had tested, concluded Zeiss, Leitz, Watson, Beck, and B&L had all come close to perfection in their apochromatics as long as flat fields were not attempted, assumes the Watson apos were of Conrady's design. M Maurer to RK, 22Mar88, tells of JAM's death (23Aug04-20May88), asks for message to be read at memorial service, promises to send microscope lenses. RK to M Maurer, 25Mar85, draft of hand-written reply, carefully asks for JAM's TI-59 calculator, M Maurer to
RK, 20Apr88, found lost microscope lenses, sending them. R Woodruff to RK, 15Apr88, reminiscences of JAM and IO, his and wife's work histories. RK replies and gives some personal history. RK to M Maurer, 27Apr88, notes for handwritten reply, thanks for carefully-sent microscope lenses. List of 20 lenses. [RK gave to MLS about 1997.] M Maurer to RK, 2May88, sending more lenses and calculator, having microscope packed carefully. RK to M Maurer, 10May88, notes for reply, profuse thanks for 30 objectives, 15 eyepieces, microscope, accessories; wanted calculator as back-up for his own aging one. M Maurer to RK, 12Jun88, offers other of JAM's things, queries what to do with large amount of raw optical glass. RK to M Maurer, 16Jun88, notes for reply, praise for JAM, asked D Moore or IO about optical glass, and he would like to have it. M Maurer to RK, 25Jun88, will give glass to IO.

Last photographs: A half-used film found in RK's Olympus camera was developed by BJT after his death. It appears to have been there a long time, judging from the image degradation. The two events pictured are a meeting of The Photographic Historical Society, and a birthday party for RK at the Episcopal Church Home, probably his 97th or 98th. Alan & David, very young, not dated. Badly worn and torn, scuffed, as though it had been carried in a wallet. Note on envelope "scanned and repaired
by Andrew Thomson." [Copy of restoration being sought./
